Office Action Summary	Application No. 10/715,296	Applicant(s) WEINZIERL, STEVEN M.	
	Examiner Lee Lum	Art Unit 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 November 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14, 16-21 and 23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-9 is/are allowed.
- 6) ☒ Claim(s) 10-12, 14, 17-19, 21 is/are rejected.
- 7) ☒ Claim(s) 13, 16, 20 and 23 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. An Amendment was filed 11/2/05.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-12, 14, 17-19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Emmerling 4317439.

Emmerling discloses an air-charging system, depicted at least in fig 1, for use* with a snowmobile* engine comprising

First heat exchanger 44 disposed to cool an air charge via (inherent) latent heat; and in "in thermal communication** with a mass of snow/ice", such that (inherent) vaporization also occurs, and, a volume of ram air is moved over** this heat exchanger (inherent), and,

Second heat exchanger 46 cooperating with the first heat exchanger, including a liquid reservoir 56 (i.e., cooling heat exchanger holding a volume of liquid) for convective cooling.

The reference also discloses a method of cooling an air charge in an air charging system, the steps derived from the structure and/or means discussed above.

* This language has minimal effect on patentability, and in light of the fact that the invention may clearly be incorporated into various types of vehicles.

** Although the reference does not explicitly disclose the location of the heat exchangers, it is extremely well-known that an air charging system requires that the air charge/ram air be introduced through an opening in the chassis or frame of the vehicle. Also well-known in such a system is that at least one heat exchanger is included to cool the air charge. Therefore, at least the first heat exchanger would be in "thermal communication with snow/ice", because snow/ice also enters this heat exchanger. Thus melting and vaporization would inherently occur.

3. ALLOWABLE SUBJECT MATTER

- a. **Claims 1-9 are allowable** because prior art does not disclose a snowmobile comprising, *inter alia*, a track tunnel opening with an intercooler opening and a wall located the front end of the tunnel and opening defining a snow/ice retention area.
- b. **Claims 13, 16, 20 and 23** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art does not disclose the air-charging system described above further comprising, *inter alia*, the reservoir delivering liquid for mixing with a fuel/air charge.

4. RESPONSE TO REMARKS

Examiner has provided new rejections for some claims, and sincerely apologizes for the inconvenience. Applicant is asked to note allowable subject matter.

5. Communication with USPTO/Examiner

Any inquiry concerning this communication, or others, should be directed to Ms. Lum at 571 272-6649, M-F, 9-5. If attempts to reach the examiner are unsuccessful, her supervisor, Ms. Lesley Morris is at 571 272-6651. Our fax number is 571 272-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for unpublished applications: private PAIR only, for published applications: private or public PAIR. For more information re PAIR: <http://pair-direct.uspto.gov>. Questions re private PAIR: contact the Electronic Business Center (EBC) at 866 217-9197.
